

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

IN these days of trained specialists it seems useless to base a primary reader upon some particular method of teaching. The trained teacher has his *own* method and only needs good material to work with; while the *untrained* teacher cannot use a particular method, even though the book is made to fit it.

Every method for teaching primary reading seems to have some points in its favor; but after many years of trial and investigation I am convinced that the best primary reader is the one that contains the *best* material, arranged in the *best* order, without reference to a particular method of presentation.

The following points in favor of this book will be readily perceived:

1. The pages are free from irrelevant matter.
2. The subjects are interesting to all children.
3. The sentences are short, and the lines wide apart.
4. Frequent pages of review sentences that are numbered, for convenience of tests.
5. The *whole lesson* is always in sight.
6. The vocabulary is unexceptionable.
7. The grading is nearly perfect.

PICTURE GAME.

Most of the common nouns used in this book are pictured out in the following pages. The teacher may create a profitable amusement for little beginners by using the pictures in the following manner: Direct the children to open books at the desired page; then write, or print, on the blackboard one of the words, telling the children to find the picture that tells what the word is. Children raise hands and teacher calls upon some one for the answer. When the correct name is given, erase the word and write another.

Make no effort whatever to teach the word, for that would spoil the play.
